Patient Instructions:

Please notify us if you are unable to attend.

Please wear a comfortable two piece attire and walking shoes for stress test.

Please bring your referral or doctor's letter to the appointment. Failure to do so may result in your appointment being cancelled.

Bring your Medicare Card with you to the appointment.

Please stop these medicines 48 hours before the stress test, after consulting with your doctor:

Atenolol, Sotalol, Metoprolol, Nebivolol, Bisoprolol, Carvedilol, Cardizem, Verapamil, Digoxin.

For more information please visit the website: www.drruddcardiology.com.au

ECG

Records the electrical activity of the heart. The skin is prepared by rubbing or shaving so that the recording dots stick to the skin. Duration: 5 minutes

Echocardiography

Ultrasound to take pictures of your heart to assess its function and structure. No preparation needed. Duration: 30 minutes

Stress Echocardiography

This test involves exercising on a treadmill for a short duration of time while monitoring your heart rhythm and blood pressure. Ultrasound images of heart are taken before and after exercise. Duration: 40 minutes

Holter Monitoring

Records your heart rate and rhythm for 24 hours. You wear a small recorder with three short wires from the recorder attached to your chest. You can continue your normal activities during the 24 hours of Holter Monitoring. The only restriction is no showering. Duration: 10 minutes to fit the recorder

24 Hours Blood Pressure Monitoring

Records your frequent blood pressure readings over a 24 hour period of time. You wear a small recorder and a blood pressure cuff. You can continue your normal activities during the 24 hours of monitoring. The only restriction is no showering. Duration: 10 minutes to fit the recorder
